

73-3b-301 Storage account -- Monitoring and reporting required.

- (1) The state engineer shall establish a storage account for each groundwater recharge and recovery project for which a permit has been issued.
- (2) In accordance with specifications of the state engineer, any person holding a groundwater recharge or recovery permit shall:
 - (a) monitor the operation of the project and its impact on land, the groundwater aquifer, and water rights within the project's area of hydrologic impact; and
 - (b) file reports with the state engineer regarding:
 - (i) the quantity of water stored and recovered; and
 - (ii) the water quality of the recharged water, receiving aquifer, and recovered water.

Enacted by Chapter 146, 1991 General Session
